MAROTTA DENTAL STUDIO

Scheduling Chart

Our goal is to produce quality dental restorations in the United States of America with ADA approved materials. We take pride in quality craftsmanship and our restorations meet multiple quality control standards, so please allow sufficient scheduling time to enable us to provide the level of work you deserve. We have organized this sheet for your use in scheduling cases with us to simplify scheduling and to reduce calls for time.

The time indicated includes the pick-up and delivery day; weekends and holidays are not included. Cases involving attachments and specially ordered parts will be scheduled when the parts arrive. Please take into consideration that implant restorations usually require components that need to be ordered.

We do our best to accommodate special need dates. If a rush is required we ask that you pre-arrange a special pick-up and perhaps a special delivery.
